

# Bron, Brian D.

Web Designer / Illustrator / Graphic Artist

## About

I am Brian D. Bron from the Philippines. I'm a Web and Graphics Designer. I love designing beautiful websites with usability and web standards in mind.

I've been doing web and print graphics for almost 6 years now, but my strong points and likings gear towards web design and illustration. I've started doing some personal illustration projects to enhance my skills and possibly someday make money out of it. T-shirt design is I think my next destination.

I am also into photography but certainly am no expert on it.
